Luk3Yao's Neo/vim Config

Lean mean Neo/vim machine, 30-45ms startup time.

Best with Neovim or Vim 8 with +python3 extensions enabled.

screen.png

Features

- Fast startup time
- · Robust, yet light-weight
- · Lazy-load 95% of plugins with [Shougo/dein.vim]
- Custom side-menu (try it out! Leader+I)
- Modular configuration
- Denite (Unite's successor) centric work-flow
- Extensive Deoplete setup (auto-completion)
- Lightweight simple status/tabline
- Easy customizable theme
- · Premium color-schemes
- · Central location for tags

Pre-requisites

- Python 3 (brew install python)
- Python 2 (brew install python@2)
- Neovim (Optional, brew install neovim)
- virtualenv for both python3 and python2:

```
pip2 install virtualenv
pip3 install virtualenv
```

- Manually config the python3 path but not using detecting automatically to accelerate the startup
- Rust & Cargo (to accelerate the icon render)

```
curl https://sh.rustup.rs -sSf | sh # install the Rust and cargo at the same time
cargo install bat | brew install bat # preview
cargo install devicon-lookup # faster render the file notation
```

For coc modules(if you are using yarn to install):

```
npm install -g yarn
yarn config set https-proxy http://localhost:3128
and then exe follow in ex-mode:
:call coc#util#build()
```

Recommended Tools

- ag (The Silver Searcher): ggreer/the silver searcher
- z (jump around): rupa/z
- Universal ctags: ctags.io
- Fuzzy file finders: fzf, fzy, or peco
- Tern: npm -g install tern
- bat
- rg
- issw: auto switch input sources on mac os

Structure

- config/ Configuration
 - basic Basic config about Behaviour, UI etc.
 - dein dein config yaml
 - plugins/ Plugin configurations
 - vimrc Initialization
- ftplugin/ Language specific custom settings
- plugin/ Customized small plugins
- snippets/ Personal code snippets

Plugin Highlights

- · Package management with caching enabled and lazy loading
- Project-aware tabs and label
- Completion for Go, Python, Naive Java, C etc. supported by coc.nvim

Note that 95% of the plugins are [lazy-loaded].

Behaviour

· issw: auto switch input sources on mac os

switch to ABC input in normal mode automatically by following

It's comfortable with markdown-preview.nvim and cVim while cjk mode is used.

```
" auto switch im in macos
" com.apple.keylayout.ABC
```

" com.baidu.inputmethod.BaiduIM.pinyin

" com.baidu.inputmethod.BaiduIM.wubi

```
au InsertEnter * call system('issw com.baidu.inputmethod.BaiduIM.wubi')
au InsertLeave * call system('issw com.apple.keylayout.ABC')
```

Plugins

StartUp

- dein □ Dark powered Vim/Neovim plugin manager
- spaceline.vim vim statusline like spacemacs
- vim-buffet IDE-like Vim tabline

Markdown

- vim-markdown Markdown Vim Mode http://plasticboy.com/markdown-vim-mode/
- markdown-preview.nvim markdown preview plugin for (neo)vim
- tagbar-markdown vim-tagbar extension for markdown
- vim-emoji @ Emoji in Vim

Keybindings

KeyMap

- Default leader SPACE localleader; ,The vim keymap in mappings.vim,Plugins keymap in core/plugins/allkey.vim
- Insertkey like emacs
- if you find the keymap doesn't work , Or the keymap doesn't show in this keylist but in allkey.vim, you can create a issue. Welcome PR.
